SUMMARY

A software developer built on a strong foundation in design thinking and a natural eye for structure, logic, and clean design. I bring a creative yet analytical approach to every challenge, translating complex problems into well-structured solutions. Adaptable and collaborative by nature, I am committed to embracing new challenges and growing alongside the company.

SKILLS

Languages: JavaScript | TypeScript | Python | HTML | CSS | C# | .NET

Developer Tools: Axios | Postman | Prisma | Git | GitHub | REST APIs | Figma | Cloudflare | Playwright | Vitest

Libraries/Frameworks: ReactJS | NodeJS | NextJS | NestJS | VueJS | Express | TailwindCSS | Framer Motion | Redux | Zustand | JWT | Bcrypt | Socket.io | Mapbox | Angular

Database: MySQL | PostgreSQL | NoSQL | Firebase | Supabase

DevOps/Deployment: Docker | CI/CD | Github Actions | Vercel | Railway | Render | TiDB Cloud

Full-Stack | UX/UI Design | Software Testing | A/B Testing | Adobe (Photoshop,illustrator,indesign) | Thai | English (TOEIC 920)

EDUCATION

CodeCamp Fullstack Developer #22

Jan 2026 - May 2026

Chulalongkorn University

2020 - 2025

Bachelor of Architecture Program in Architecture, Faculty of Architecture.

ÉNSAV

Sep 2023 - Jan 2024

Exchange program at École nationale supérieure d'architecture de Versailles in France.

PROJECTS

Pich & Go

- Built a Thailand-based hotel booking platform that covers the full hotel booking journey from browsing and booking to payment and post-stay reviews, with additional features including a favourites system and a loyalty rewards program.
- Engineered a seamless booking and payment flow using **Stripe**, with full booking history tracking and an admin panel for operational management.
- Integrated an **AI-powered chatbot** for real-time customer assistance, delivering personalized responses to guest inquiries and service FAQs.
- Set up a **CI/CD** pipeline with **GitHub Actions** to automate builds and deployments to Vercel.

Onlyfriendssss

- Led end-to-end design and full-stack development for a mobile base social community application, that facilitates real-world meetups through interest-based activity hosting. (Product Owner, Full-Stack Developer, and UX/UI Designer)
- Engineered a **real-time chat and slot tracking system** using **Socket.io**. Integrated **Mapbox** for location-based activity discovery and **Google OAuth** for secure authentication.
- Implemented a host-mediated "Pending/Approved" join flow, keeping live slot counts accurate.
- Designed a custom **Peer-to-Peer scoring system** to promote accountability and maintain a trustworthy community.

WORK EXPERIENCES

eibiz | Fullstack Developer Intern

July 2026 - current

- Built a reusable UI component library and its documentation site, serving as the company's internal knowledge base for UI, giving teams a shared, copy-paste set of components and blocks for faster, consistent development.
- Developed data-intensive Smart City dashboards end-to-end, from backend APIs to real-time frontend visualization.
- Collaborate in an Agile environment, participating in sprint planning and standups to ship production-ready features.

Relearn Solution | Teacher Assistant

July 2026

- Assisted in teaching Playwright automation testing as a Teaching Assistant.

K2LD | Architect Intern at singapore

May 2024 - Aug 2024

- Participated in all phases of design and construction across residential projects. Researched and developed proposals and the design with seniors. Then producing drawings, construction drawings, 3D models, renderings, and presentations.
